PRODUCT OVERVIEW

Citrix[®] GoToMyPC Corporate

Citrix[®] GoToMyPC Corporate is the simplest, most cost-effective solution for secure remote access on the market. Shrinking budgets and mounting competitive pressures require your enterprise to be more productive with fewer resources. GoToMyPC Corporate reduces the costs and complexity associated with other remote-access solutions; it offers the highest levels of security and control; and it immediately increases employees' productivity.

Citrix GoToMyPC Corporate delivers a fully managed solution with minimal deployment expenses.

Citrix GoToMyPC Corporate will help your organization:

- Avoid costly infrastructure changes and lengthy implementations
- Experience quick, seamless deployment
- Improve end-user remote-access experience
- Increase employee productivity while reducing remote-access costs

“A CIO who wants to forgo all the hassles involved with VPNs and even their SSL alternatives can also consider screen-sharing technology such as GoToMyPC Corporate.”

— CIO Magazine

As the global workforce becomes increasingly mobile and geographically distributed, businesses require their technology investments to meet their employees' need for instant access to information. When employees are given the opportunity and flexibility to work at any time, from anywhere, you empower them to become more productive, reliable and connected to your company's goals.

The total cost of ownership (TCO) of remote access is increasing as the demand for it grows. Citrix GoToMyPC Corporate contributes to reducing your infrastructure costs while meeting your need for scalability by delivering a fully managed solution with minimal deployment expenses.

ALL THE TCO ADVANTAGES OF A FULLY MANAGED SERVICE

With Citrix GoToMyPC Corporate, there's no investment in hardware, software or integration. And because there are no changes to servers, systems or security infrastructure, your deployment expense is minimal. Implementation is quick, and your costs remain low because there is no maintenance required, no upgrades to manage and little, if any, end-user support. Citrix GoToMyPC Corporate offers a considerably lower setup and recurring cost structure, enabling your organization to expand its remote-access community without increasing overall costs.

SIMPLEST SOLUTION ON THE MARKET

Citrix GoToMyPC Corporate is simple for end users and simple for IT to deploy, configure, control and support. It provides access to the entire desktop – no client installation is required and there's no need to Web enable legacy applications.

MULTI-LEVEL SECURITY AND CONTROL

Citrix GoToMyPC Corporate uses advanced Web-based screen-sharing technology that works with your existing security and network configuration, firewall and Internet infrastructure. It enables your end users to get secure, encrypted remote access to their desktops from any Internet-connected computer or Pocket PC or Windows® CE wireless device.

All Citrix GoToMyPC Corporate servers are located in highly secured data centers and audited by TruSecure. All data is highly compressed and protected with end-to-end 128-bit AES encryption. Multiple password and authentication methods include support for RSA SecurID tokens. Feature-access controls enable IT to set up end users and end-user groups according to features they are authorized to use, while end-point management enables IT to control access points via client and host authorization.

END-USER KEY FEATURES:

REMOTE-ACCESS

- Automatic 2-Minute Setup — No client software installation is necessary
- Resizable Viewer — Adjust resolution for optimal viewing of host PC
- PocketView™ — Secure access from a Pocket PC
- File Transfer — Drag and drop files, folders and directories between computers
- Remote Printing — Print documents from host PC to local printers
- Guest Invite — Enable anyone to view or share control of a host PC
- Draw — Highlight and draw to emphasize items of interest
- Chat — Communicate with a guest while sharing a host PC

SECURITY

- AES (Advanced Encryption Standard) — 128-bit keys automatically protect data stream; file transfers; chat; keyboard and mouse input
- Authentication — Dual passwords and end-to-end user authentication
- Viewer Security Time-Out — Configure to time out after inactivity period
- Host Security — Automatically blank host PC screen and lock host keyboard and mouse
- One-Time Passwords — Provide an enhanced level of security
- Log-In History — View all log-in attempts and spot any unauthorized activity

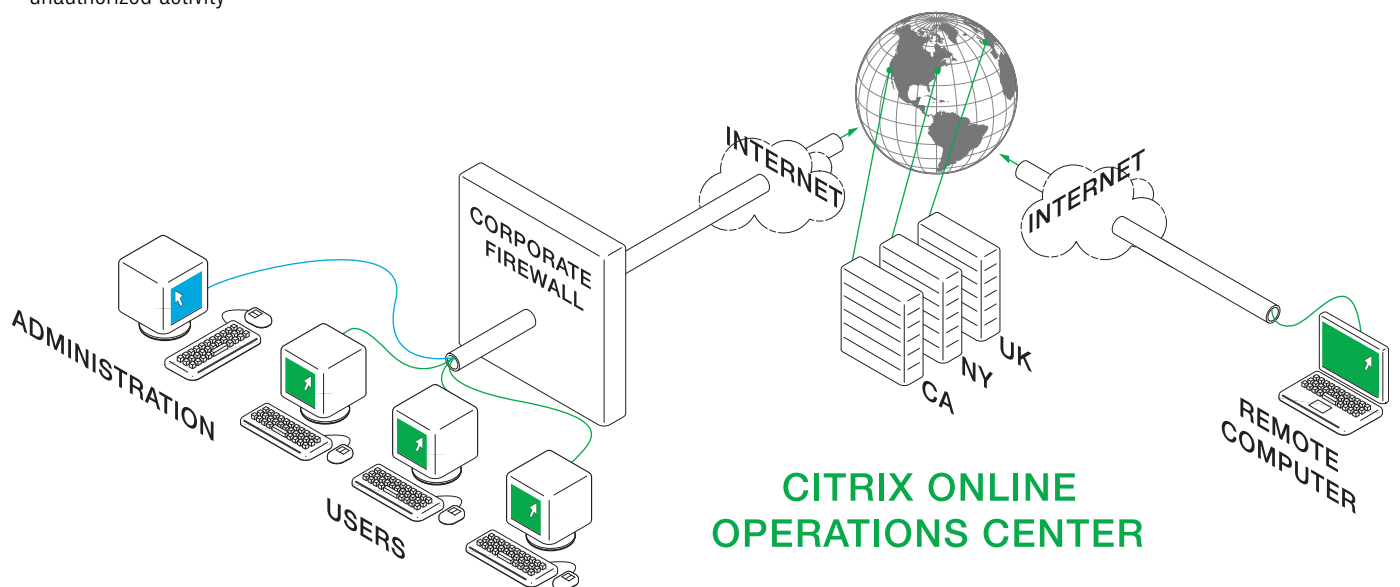

ADMINISTRATION KEY FEATURES

USER CONTROL AND MANAGEMENT

- Easy User Management — Easily add and remove user accounts
- Real-Time User Control — View end-user connections in real time and end if necessary
- Feature-Access Control — Grant or deny access to specific features

SECURITY SETTINGS

- Password-Change Enforcement — Prevent re-use of passwords and schedule password and access code expirations
- Host Security Settings — Enforce end-user security settings
- Failed Log-In Lockout — Configure lockouts for cumulative failed log-in and access code attempts
- Hours of Access — Define days and times end users can log in
- One-Time Passwords — Enforce the use of one-time passwords
- RSA SecurID Integration — Integrate with your existing RSA SecurID infrastructure
- End Point Management — Authorize setup of host and client computers requiring a unique identifier
- Monitoring and Reporting — Real-time, robust and intuitive report generation

CITRIX GoToMyPC CORPORATE

Citrix GoToMyPC Corporate is a Web-based remote-access solution that allows easy and instant access to any PC from any Internet-connected computer or Pocket PC. GoToMyPC Corporate reduces the costs and complexity associated with other remote-access solutions; it offers administrators the highest levels of security and control; and it immediately increases employees' productivity. A personalized online Administration Center enables your IT administrator to roll out secure remote access to your entire organization in minutes. The Administration Center is designed to be intuitive and user friendly to give your IT administrator quick and centralized access to all the features for setting up and canceling end-user privileges, controlling feature-access rights and monitoring usage in real time.

COST ADVANTAGES

- Boost productivity, build a competitive advantage and cut costs by delivering remote access to your mobile and remote staff
- Network-based service speeds deployment by eliminating upfront costs of hardware procurement, software installation and network systems integration
- Fully managed service is less expensive to administer since IT costs are amortized over thousands of users
- We do all the heavy lifting associated with installing, maintaining and tuning the underlying platform
- Browser-based solution is less expensive to operate and end users do not need to spend time configuring or learning to use VPN clients

SIMPLICITY

EASY FOR IT

- Centrally manage remote access from a secure, online interface. No need to configure multiple devices or make changes to network architecture

EASY FOR END USERS

- Intuitive end-user interface provides easy-to-use remote access for employees and reduces support demands on IT

MULTI-LEVEL SECURITY

- Using 128-bit AES encryption and a highly secure data center authorized by TruSecure, all data is compressed and protected with end-to-end encryption. No firewall changes are required
